Contents of volume 82

Number 1

Regular articles

ROBYN LANGDON and MAX COLTHEART (*Macquarie University*)
Visual perspective-taking and schizotypy: evidence for a *simulation*-based account of mentalizing in normal adults, 1–26

MICHAEL R.WALDMANN and YORK HAGMAYER (*University of Göttingen*)
Estimating causal strength: the role of structural knowledge and processing effort, 27–58

Discussion articles

WOO-KYOUNG AHN (*Vanderbilt University*), CHARLES KALISH (*University of Wisconsin*), SUSAN A. GELMAN (*University of Michigan*), DOUGLAS L. MEDIN (*Northwestern University*), CHRISTIAN LUHMANN (*Vanderbilt University*), SCOTT ATRAN (*Centre National de la Recherche Scientifique*), JOHN D. COLEY and PATRICK SHAFTO (*Northeastern University*)
Why essences are essential in the psychology of concepts, 59–69

MICHAEL STREVENS (*Stanford University*)
Only causation matters: reply to Ahn et al., 71–76

Brief articles

ZENZI M. GRIFFIN (*Stanford University*)
Gaze durations during speech reflect word selection and phonological encoding, B1–B14

SVEN BLANKENBERGER (*Martin-Luther-Universität Halle-Wittenberg*)
The arithmetic tie effect is mainly encoding-based, B15–B24

HANS-CHRISTOPH NUERK (*University Hospital of the RWTH Aachen*), ULRICH WEGER (*Institute of Psychology*) and KLAUS WILLMES (*University Hospital of the RWTH Aachen*)
Decade breaks in the mental number line? Putting the tens and units back in different bins, B25–B33

SID KOUIDER and EMMANUEL DUPOUX (*EHESS/CNRS*)
A functional disconnection between spoken and visual word recognition: evidence from unconscious priming, B35–B49

Number 2

Regular articles

RENÉE BÉLAND (*Institut Universitaire de Gériatrie de Montréal, Université de Montréal*) and ZOHRA MIMOUNI (*Institut Universitaire de Gériatrie de Montréal, Cégep Montmorency*)
Deep dyslexia in the two languages of an Arabic/French bilingual patient, 77–126

LAURE R. SANTOS, MARC D. HAUSER and ELIZABETH S. SPELKE (*Harvard University*)
Recognition and categorization of biologically significant objects by rhesus monkeys (*Macaca mulatta*): the domain of food, 127–155

JONAS T. KAPLAN and ERAN ZAIDEL (*University of California*)
Error monitoring in the hemispheres: the effect of lateralized feedback on lexical decision, 157–178

Brief articles

FRANK E. POLLICK (*Glasgow University, ATR International*), HELENA M. PATERSON (*Glasgow University*), ARMIN BRUDERLIN (*Sony Imageworks*) and ANTHONY J. SANFORD (*Glasgow University*)
Perceiving affect from arm movement, B51–B61

HANAKO YOSHIDA and LINDA B. SMITH (*Indiana University*)
Early noun lexicons in English and Japanese, B63–B74

Number 3

Regular articles

F.-XAVIER ALARIO and ALFONSO CARAMAZZA (*Harvard University*)
The production of determiners: evidence from French, 179–223

ROMINA PALERMO and GILLIAN RHODES (*The University of Western Australia*)
The influence of divided attention on holistic face perception, 225–257

Discussion article

CYNTHIA FISHER (*University of Illinois*)
The role of abstract syntactic knowledge in language acquisition: a reply to Tomasello (2000), 259–278

Brief articles

THAD A. POLK, CHARLES BEHENSKY, RICHARD GONZALEZ and EDWARD E. SMITH (*University of Michigan*)
Rating the similarity of simple perceptual stimuli: asymmetries induced by manipulating exposure frequency, B75–B88

TIMOTHY L. HUBBARD and MICHAEL A. MOTES (*Texas Christian University*)
Does representational momentum reflect a distortion of the length or the endpoint of a trajectory?, B89–B99

JESSICA MAYE (*University of Rochester*), JANET F. WERKER (*University of British Columbia*) and LOUANN GERKEN (*University of Arizona*)
Infant sensitivity to distributional information can affect phonetic discrimination, B101–B111

AKIHIRO IZUMI (*Kyoto University*)
Auditory stream segregation in Japanese monkeys, B113–B122
